

NIRA - Meeting Notes
Meeting Convened: September 7, 2012

Details on Tony's rocket fun day

Since we do not have a club launch this month, Sunday the 16th will be a build/video session at Tony's home from about 12:00 onward. Bring in those kits and have fun. The last time we did a build session was at a club meeting and it was loads of fun.

NIRCON 2013

We discussed next year's NIRCON which will take place in February. NIRCON 2012 was a lot of fun and next year will be even better. We discussed the possibility of having a swap meet during the lunch and a little after in the afternoon so attendees will not miss any presentations. We discussed developing a list of talks to choose from so we can provide what people want to hear.

Model of the Month

Mark Jensen beat out everyone for Model of the Month, September 2012 with his Hydra Sandhawk.

TARC

We had a TARC team present at the meeting with questions about their rocket build. In our usual club way we blew their minds with all kinds of advice and issues to ponder.

All in all it was a fantastic meeting

Thanks
